

**Section A: Networks**

1. A group of connected devices that can share information
2. e.g. a laptop, phone, or tablet
3. Connect to the internet without cables
4. The internet is the network of connections; the World Wide Web is the collection of websites accessible through it
5. e.g. the school's Wi-Fi or computer network

Section B: Internet Safety & Security

1. A URL (web address)
2. Because data takes longer to send and receive with a slower connection
3. e.g. through Wi-Fi, or a cable
4. Because a weak password could let someone else access your account and personal information
5. e.g. parental controls, or content filters
